

Feedback from the ACT Board – 28-7-11

The Board noted the request for feedback due by 1 August.

Ms Boyd comment that on page 14 of the consultation draft of the supervision guidelines at Supervision Agreement - Form A, it states– “I have considered the amount of time per week (in hours) that I plan to devote to the supervision activities that are planned for the prospective supervisee, and will document them on the supervision plan that is to be submitted to the Board after the first three months of supervision.”

It was agreed the point was not clear and required to be checked and reworded for clarity about supervision plan (Form C) which has to be submitted within the first month and then updated plans (Form E) to be resubmitted every three months.

On page 16 of the same document where it states– “I understand that all overseas trained physiotherapists under my supervision must complete an Orientation to the Australian Healthcare system and will make such an orientation program available to the person to be supervised.”, it was suggested that “overseas-trained” should be amended to “internationally-trained” physiotherapists.

Queries were also raised as to: Where is it? Who does it? Do we have a package for it?

The Chair would pass on the feedback to the National Board.
