Paul,

I have reviewed the three documents and find them clear and quite directive. I have one query about public interest where a letter from employer is required. As this pertains now to disaster situations mainly, if the physiotherapist was to be engaged by an aid organisation (and not be an employee as such) does this document cover that situation?

I read the Consultation draft: Supervision guidelines separately and note the other two documents state 'limited registration' either in the heading or directly underneath, but this document doesn't. Page 3 space after Appendix 2 required  
Page 6 Form A is not in bold, whereas the other forms are.

Page 12 Appendix 2 – this table is valuable in making the reporting requirements clear for the different types of registration covered by this paper. Although there are quite a few different forms to be completed, the process outlined here is easy to understand. It is a well written document.

Thank you for the opportunity to comment.

Marie-Louise
