

Thank you for the opportunity to comment on the consultation paper on criminal history checks. We have consulted our stakeholders and would like to make the following comment:

The general consensus from those who provided feedback is that Option 2 ([Applicant provides criminal history clearance evidence with application](#)) is preferred – some of our facilities do police checks and international ones are requested. If this was a consistent approach from AHPRA and down, then this would be easier for the applicant and save delays waiting for these for credentialing.

Please do not hesitate to contact me if you require further contributions.

Regards
A Jones
